

Aristocrat to unveil two new games for the Spanish arcade/salon market

London, 15th December 2010

Aristocrat Technologies continues to expand its portfolio of Type B games dedicated to the Spanish arcade/salon gaming market with the unveiling of two newly developed video titles at the forthcoming ICE exhibition in London (25-67-27 January). Following similar 5 line characteristics of other Aristocrat games that are currently building market share in the Iberian street sector, *Mystic Mermaid™* and *Wicked Winnings™* will be previewed for the first time on ICE stand 3415.

Aristocrat games currently operating in Spain have a unique style derived from casino floor game play. Adoption rates by players and operators alike have gathered great momentum over recent weeks as Christian Colus, Aristocrat's Head of Sales for Southern Europe, explained: "Performance of existing models Big Red™, Dolphin Treasure™ and Queen of the Nile™ has been very impressive and sustained over a long period. This has led to a significant increase in new orders, which we believe will prolong the lifetime of these games as they are introduced to more players.

"We have built strong partnerships with leading regional operator/distributors Comdibal2000, Egasa and Grupo Vid and continue to work closely with them in the development of new products. As the popularity of our first wave of games continues to build, it is crucial we maintain delivery of equally strong follow-up titles and visitors to our stand at ICE will get a first glimpse of these exciting new developments for 2011."

Mystic Mermaid and Wicked Winnings are existing 5-reel Aristocrat games with proven performance in other markets, now adapted to suit the specific tastes of Spanish arcade/salon players with familiar scatters, wilds, open games and bonus respin features. Mystic Mermaid continues the underwater theming introduced by Dolphin Treasure, resplendent with marine symbology, whilst Wicked Winnings offers a new thematic proposition fronted by a seductive 'She Devil' who substitutes for all symbols during game play.
